

## Technology Solutions for Government Agencies and the People They Serve

J2 Interactive is an award-winning software development and IT consulting firm specializing in customized solutions for health systems, research institutions, health information exchanges, and government agencies. Our approach is rooted in the fundamental belief that systems succeed or fail based on how well they serve the people who depend upon them. That includes clinical care providers, IT professionals, and administrative staff... but ultimately, it means service members, veterans, Native Americans, and every US citizen who receives government services and benefits.
