

Comprehensive Strategies for Getting the Most Out of Epic

Whether you're just embarking on a move to Epic or you've been live for years, your organization's success will depend on more than setting up and configuring the software itself. That's why so many Epic customers have turned to J2 for services and solutions that ease the Epic transition, accelerate provider adoption, and leverage Epic data to drive their most strategic goals.

If you're looking to maximize the impact of your Epic investment, here are just a few of the ways J2 can help:

■ Plan and execute your Epic interoperability strategy

Updating all of your interfaces in preparation for an Epic rollout can be a massive undertaking. Customers like **Rush University Medical Center** and **Spectrum Health** were able to make the task easier by relying on J2's deep expertise in Epic Bridges, Care Everywhere, and all of the most widely-used commercial interface engines.

■ Migrate your legacy data into Epic

Legacy data conversion is an often underappreciated aspect of any system transition. J2's proven methodology helped **Cedars-Sinai Medical Center** and **Cone Health** faithfully migrate years' worth of clinical data into Epic.

■ Expand your Epic footprint

If you're bringing new hospitals or provider groups into the Epic fold, J2 can help you establish the necessary connections to ensure seamless interoperability. After helping **University of Colorado Health** complete its initial Epic go-live, J2 played an instrumental role in integrating three additional hospitals into UCH's growing network.

■ Achieve true interoperability with other EHRs

Sometimes it simply isn't realistic to expect every provider in your network to standardize on a single EHR. That's why **MemorialCare Health System** turned to J2 to enable expanded HIE functionality to exchange CCD data between Epic and the outside EHR platforms used by its affiliated medical groups and partners.

■ Integrate third-party application workflows into Epic

If you're building a software application that needs to share data with Epic, we can help. J2's technical architects have provided best-practices consulting to numerous companies looking for an Epic integration strategy that will last over the long haul.

■ Leverage Epic data for accountable care and population health

Whether you're trying to get the most out of Clarity and Cogito, or looking to bring your clinical and operational data into another data warehousing or analytics tool, J2 can help you establish an effective strategy for revenue cycle analysis, quality metrics tracking, and population health management.

"The strategic collaboration we have experienced with J2 has been invaluable to our organization. They have been instrumental in helping create architectural solutions to expand our interoperability platform."

—Ron Lyse
Manager, HIE & Integrated Systems Architecture
MemorialCare Health System

—Linda Journet
Manager, Integrated Systems Optimization
MemorialCare Health System

"I cannot speak highly enough about J2 Interactive's knowledge, professionalism, and dedication to a project. J2 Interactive goes a step beyond."

What We Do

- Architecture / best practices
- Project management
- Systems integration
- EHR interoperability and HIE
- Enterprise master patient index
- Mobile / web applications
- Reporting and analytics
- Systems support / optimization

A Partner You Can Trust

For almost 10 years, J2 has been helping hospitals and health systems achieve excellence with Epic at every stage of the adoption curve. **We're consistently at the top of KLAS' annual rankings** for Technical Services because of our extraordinary commitment to our customers' success. We're not a placement firm pulling resumes from a database of independent contractors – every member of our staff is a full-time employee, backed up by a team of over 100 healthcare IT consultants in the US and UK.

J2 doesn't just bring a large team of Epic experts who know the full suite of Epic modules inside and out. We're also the recognized leader in application development and integration services on the InterSystems technology at the heart of Epic. Because our resources are cross-trained in the industry's leading interface engines, and have extensive experience integrating with a host of EHRs and other healthcare applications, **we have the know-how to overcome your most complex interoperability challenges.**

Whether you're looking for a team to execute a large-scale project from end to end, or you just need some best-practices consulting or staff augmentation to put your projects on the right track, **J2 has the flexibility to provide an engagement model that best fits your circumstances and budget.** And when our work is done, we will always leave your internal staff with the knowledge and training to maintain and enhance what we've built.

If you need a partner who understands how to help you get the most out of your investment in Epic – now and for the long term – give J2 a call.
