

Ops Monitor

Comprehensive 24x7 monitoring for all of your HealthShare® environments

J2's Ops Monitor lets you rest easy knowing your HealthShare environments are being monitored around the clock for critical systems-level and application-level events. Ops Monitor generates real-time alerts, based on configurable thresholds, for any of the following issues:

- Large HealthShare message queues
- HL7, IHE and FHIR interface errors
- Lost adapter connections
- Stopped productions
- Login failures
- Disk space warnings
- CPU spikes
- Other custom events

J2's Ops Monitor provides graphical monitoring tools and automated alerts across all of your HealthShare servers and productions.

With Ops Monitor, you'll have a centralized console for tracking systems status and warning signs at a glance, no matter how complex your setup. And because Ops Monitor is built natively within HealthShare, it's easy to customize it to fit your organization's specific needs. You can even integrate Ops Monitor with other enterprise monitoring software to manage all of your systems in one place.

Clients of all sizes have relied on J2's Ops Monitor to keep HealthShare running at peak performance.

- Baystate Health
- Centegra Health System
- LifeLabs
- Lincolnshire Health and Care
- MemorialCare Health System
- Northwell Health
- Rhode Island Quality Institute
- Torbay South Devon NHS Foundation Trust
- SCL Health
- UP Health System Marquette

Get Ops Monitor, and never worry about your HealthShare environments again.

J2 can help you get the most out of your InterSystems investment.

Since 2004, J2 has been providing InterSystems customers with unmatched expertise that spans the entire HealthShare product family:

- Health Connect
- Information Exchange
- Patient Index
- Provider Directory
- Personal Community
- Health Insight

Whether you're using one of these components or all of them, J2 can help you maximize the value of your HealthShare investment with solutions and support services tailored to your organization's unique needs.

"J2's expert systems team keeps us on top of HealthShare best practices, so we can take full advantage of the latest features and eliminate risks before they become problems. With J2 managing our HealthShare environments, I can keep my internal team focused on innovating for our stakeholders and community partners."
